Summary

I'm a dedicated graphic designer with a strong ambition to excel in the dynamic tech industry. My unique blend of design expertise, combined with unwavering enthusiasm, positions me as a versatile web designer proficient in both coding and design. This dual proficiency enables me to bridge the gap between design and development teams, fostering efficient communication and innovation in web projects.

Skills

Technology

- Proficient in a wide array of technologies: HTML, CSS, React JS, Node JS, Express JS, and MongoDB.
- Possess a strong command of JavaScript, facilitating intricate programming tasks.

UX/UI Design

- Proficiency in Figma and Adobe Suite for crafting compelling user interfaces and user experiences.

Projects

Project Title: 100 Best Albums of All Time Website (<https://top110albums.netlify.app/>)

- Album and artist search, user account creation with playlist management, innovative administrative route for data analysis and visualization.
- Developed a dynamic website, seamlessly integrating e-commerce capabilities with an exhibit of significant music albums.
- Leveraged React JS and a robust MongoDB backend to ensure optimal performance.
- Designed a user-friendly experience using Figma, resulting in an intuitive interface.
- Implemented an advanced music player feature, securely storing song snippets on the server for a seamless auditory experience.
- Engineered a cart function, streamlining user-friendly album purchases.
- Innovated an administrative route within the project, granting access to purchase data, user account creation details, and user activities.
- Crafted visually engaging charts to summarize user actions, including purchases, additions to personal playlists, and user preferences, emphasizing similarities with their favorite selections.

Education

CoderSchool, District 1, HCMC

Web Development Track

- Successfully completed an intensive web development program, with over 20 hours per week, mastering fundamental web development and JavaScript programming.
- Gained hands-on experience in constructing comprehensive Full-Stack MERN Web Applications.

OCAD University, Toronto, Canada

- Bachelor of Design (B.Des.)
- Major in Graphic Design

Ho Chi Minh University of Fine Art, Ho Chi Minh City

- Major: Fine Art

Experiences

Graphic Designer | Toronto

Propeller Gallery

June 2023

- Skillfully designed captivating posters and banners for gallery events and solo exhibitions.
- Developed a sophisticated newsletter system for the gallery, featuring cohesive templates for effective subscriber communication.
- Significantly improved the user experience of the gallery's website by streamlining and decluttering elements, resulting in improved navigation.
- Crafted a dedicated website section commemorating the gallery's illustrious 50-year history.

Freelance Designer | Toronto

2017 – Current

- Provided comprehensive brand identity design services to startup ventures in Vietnam, Canada, and Japan.
- Conceptualized and executed UX designs, ensuring seamless integration of new products into websites.
- Designed and developed personalized websites, including portfolios and wedding ceremony platforms, tailored to individual client specifications.
